

Listening to your equipment support needs

CASMED is proud to serve the needs of the worldwide healthcare community. Everyday, CASMED products are being used as critical components in the patient care process. The customer support team understands this responsibility and is committed to providing the highest level of support and attention.

740 Vital Signs Preventative Maintenance Program

Our service department is dedicated to keeping CASMED equipment running at peak condition. Our comprehensive preventative maintenance program has been designed to ensure facilities the longest monitor life span with the maximum uptime possible; resulting in an overall cost savings.

By going through a like new process, we are able to:

- Perform internal design revisions and update software
- Replace the NIBP receptacle along with any other connections that may have become loose to prevent air leaks at hose connection
- Test all accessories sent in with the monitor
- Battery replacement to ensure full charging capabilities
 - Existing battery pack to be returned with monitor (or additional charges may be incurred)
- Replacement of the temperature module switch board (SureTemp® Technology only) to prevent intermittent temperature readings
- Front panel keyswitch & housing replaced as needed returning unit to *like new* condition
- NIBP Pneumatic check
- Monitor Safety Leakage Check/ Hi-Pot Test
- Updated labeling
- Functional checks, QA testing & calibration of the unit for more accurate readings

If you are interested in our Preventative Maintenance Program, please contact CASMED Customer Support for current pricing and to set up an RMA for return

Thank you for allowing CASMED to continue to support your equipment servicing needs.
